W. C. VASON, Farm Supervisor
GEORGE V. ATKINSON, Foreman Industrial Shop
MRS. MARY FELLOWS, Supervisor Sewing Room
MRS. JUHL SHELFER, Matron, Nurses' Home

HISTORY AND LOCATION

The Florida State Hospital was created by Legislature of the State of Florida for the maintenance, care and treatment of the indigent insane of the State, with provision, however, for the care of the insane, other than indigent, at a rate of pay prescribed by the Board of Commissioners of State Institutions, which is \$28.00 per month. Out of the 2,488 patients, we have at present only thirty-six pay patients. The location is at Chattahoochee, Gadsden County, Florida, two miles north of River Junction, which is the railroad station; and a little more than one mile east of the Apalachicola River. This location was selected in 1832 as a garrison for Federal soldiers, during the time of the Indian wars, long before railroads, and when the river was the only means of transportation. The buildings erected and used by the Federal Government are still standing and in a good state of preservation. In 1866, the arsenal and all the land, consisting of about 1,800 acres at the time, was ceded by the U. S. Government to the State of Florida. For about ten years following the property was used as a State Penitentiary. Since 1876 it has been used as an institution for the care of the insane.

The location is in many respects ideal. The climate the year round is as good as anywhere in the United States, since it is just cold enough in winter to be bracing, and pleasant in summer without the discomforts of sultriness. It is singular to note that not a sprig of Spanish moss can be found in the trees on this plateau, which fact indicates a dryness of atmosphere for this latitude. Being accessible to river transportation, we have the benefit of water rates, which in the item of coal alone is an economic feature.

*To the Honorable Board of
Commissioners of State Institutions,
Tallahassee, Florida.*

GENTLEMEN:

The Superintendent of the Florida State Hospital hereby respectfully submits his report for the period beginning January 1, 1925 and ending June 30, 1926.

A brief description of the more important buildings is as follows:

The Receiving Hospital is a fully equipped hospital, with up-to-date operating room, X-ray equipment, etc., where all physically sick are given the same attention they would receive at any general hospital. This is where patients are committed upon arrival, kept in bed under observation and treatment, for a sufficient period to be fully diagnosed and classified before being assigned to wards. We also have a modern tubercular building for those so affected, which is entirely separate from other patients, and which serves special diet and delicacies.

Since our last report an additional Receiving Hospital has been completed, which is of material benefit and a pronounced asset to our general equipment. This gives us an added capacity of 150 beds, which enables us to care for the cases physically ill, much more satisfactorily. In connection with this building, was constructed a new kitchen, nurses' class room, clinic room, and store room, which have likewise been of material benefit. The kitchen is situated midway of the corridor which connects the two buildings, the new and the old receiving hospital buildings, thus keeping the noise of the kitchen as well as the odors of the food, away from the hospital, and by so doing eliminates a rather objectionable feature to all hospitals.

In this building was placed an electric elevator, which is a great asset in the handling of patients, as well as supplies, etc. There has likewise been placed in the old receiving hospital building an automatic electric elevator, which has been badly needed heretofore.

We also have a new building for the colored women, which is one of the best planned buildings on the place, as the wards have been so arranged that patients can be much more satisfactorily classified than they can be in other buildings where the wards are much larger. Part of the lower floor has been fitted for use as a dining room for the colored women. The old building, previously used for colored women, has been entirely remodeled, repainted, new bath rooms built, and the wards re-arranged in a way to more satisfactorily classify the patients, and is being used to relieve the crowded condition of other departments.

MISCELLANEOUS IMPROVEMENTS

Old buildings have been renovated and remodeled. New bath rooms put in and many showers provided.

Recreation yards have been enlarged, summer houses built, swings, porch chairs and benches are provided.

The Industrial Departments have been enlarged and more emphasized, and now employ all patients who are able to do work of any kind who can be induced to engage in employment that the doctors consider of therapeutic value.

More than 40 telephones installed.

More than 100 lavatories and sinks added.

Laundry capacity increased. New equipment such as pressing machine, metal washers, electric irons, etc. Laundry service equal to town of 6,000.

Instead of home-made moss mattresses, more than 2,000 cotton and capok mattresses have been purchased, and a

modern mattress machine installed, operated by a man who understands the business, and makes cotton mattresses sufficient to supply the demand.

Drinking fountains have been placed in wards and on the yards.

The original eight foot-power sewing machines have been increased to twenty-two foot-power and twelve electric motor machines.

Cold storage capacity for two car-loads of beef and 75,000 pounds of bacon, the addition of 13 big refrigerators, distributed among buildings requiring them, and ice boxes on all wards.

New flooring has been placed in all the old wards.

New roof constructed over the General Dining Room.

Additions have been made to the fire equipment so that we are well equipped in this respect, having now two La-France steam fire engines of 750 gallons each, and soda and acid fire extinguishers distributed in each ward and nurses' home.

A new water tank has been purchased of 250,000 gallon capacity and material is all on the ground and the foundation laid ready for erection.

The drinking water supply has been obtained from a pure free-stone spring, and has afforded sufficient water for a number of years past. The reservoir, however, was inadequate and insufficiently protected. This has been remedied by the construction of two large concrete pools or reservoirs which completely enclose and afford ample protection, and avoid the waste of water.

An addition to the dining room for the white female patients, having a seating capacity of 270, with additional serving room, has been constructed and is now in use.

A forty-acre pecan grove is on the way and several thousand budded trees. We have a pecan and trifoliata nursery, satsuma oranges budded, pears, peaches, a young vineyard and various berries growing.

By authority and direction of the Board a casket manufacturing department was installed in May, 1926, and we are now manufacturing all caskets that are used in connection with the hospital, the result being to supply the demand with much more satisfactory goods from a standpoint of price and quality.

With reference to the hospital dairy, sufficient acreage of excellent quality just across the river has been purchased, and the dairy has been removed from near the hospital buildings to this land across the river. It is thus more convenient to pasturage and forage facilities, and the dairy cattle can here be cared for more economically.

Porches and buildings have been screened, electric fans supplied in summer, reading rooms furnished, and many other comforts supplied.

The grounds have been improved and beautified with trees, palms and flowers.

RECREATION AND AMUSEMENTS

On every Friday night a dance is given, in which the patients dance with the employees of the opposite sex in alternating numbers. The music for these occasions is furnished by a first-class orchestra composed of employees. An open-air concert is given on the hospital grounds twice each week. In the weekly program there is provided a moving picture show, shown on Monday nights for the benefit of the white patients and on Tuesday nights for the benefit of the colored patients. From time to time other entertainments are staged, such as amateur minstrels, plays, lectures and

musical programs, all of which are entered heartily into by the employees for the benefit and pleasure of those under their care.

DENTAL DEPARTMENT

A modern, three-chair Dental Infirmary has evolved into a helpful asset to the medical department, broadened and systematized until it is a most creditable part of our medical machinery.

HOSPITAL CHRISTIAN ASSOCIATION

The Hospital Christian Association continues to hold weekly meetings, and the Social Service work is being carried on with the same degree of interest as heretofore since its organization.

To sum up, it may be said that we have a fully equipped up-to-date hospital, but necessarily new buildings have to be added to keep pace with the rapidly growing demands, the old ones kept in constant repair, and provisions considered for expansion and improvement in all directions. An institution of this kind necessarily requires more labor and material in repairs than do buildings generally for other purposes.

For detailed information attention is invited to the reports herewith of the heads of the several departments.

The co-operation and confidence of the Board of Commissioners of State Institutions, and also of the hospital staff and all other employees is gratefully acknowledged and appreciated. Without this it would be practically impossible to make any satisfactory progress.

W. V. KNOTT,
Superintendent.

REPORT OF CHIEF PHYSICIAN

HON. W. V. KNOTT,
Superintendent.

SIR:

Kindly accept this as a report of the Medical Department of the Florida State Hospital from January 1, 1925 to June 30, 1926, during which time there have been some changes in the Staff of this Department, Dr. H. D. Snyder having resigned on March 31, 1925, his place being filled by Dr. F. M. Woodall. Dr. F. E. Thomason resigned on June 30, 1925, his place being filled by Dr. M. L. Jeter. Dr. Jeter resigned on January 1, 1926, his place being filled by Dr. J. C. Inman, Jr.

Mr. Ray Davis resigned on May 1, 1925 and on June 1, 1925, we secured the services of Mr. DeLester Sackett to fill the position of Laboratory Technician, formerly filled by Mr. Davis. Miss Pearl Summerford, Directress of Nurses, resigned on June 30, 1925, and her place has been filled since her resignation by Miss Dora Fulgham, who was formerly Assistant Directress of Nurses.

The Dental Department during this period has been under the direction of Dr. W. D. Truett, with the assistance of Dr. A. F. Douglas, who entered the service on April 15, 1926.

During the Spring of 1926 we had in the Institution a rather extensive epidemic of influenza, during which time we had something over 1,000 patients suffering from this condition. However, the epidemic was of a rather mild type and there were only a few fatalities of this particular condition.

The following is the Staff at this time:

J. Q. FOLMAR, M. D., Chief Physician and Surgeon
B. F. BARNES, M. D.

J. M. BEGGS, M. D.

W. C. McCONNELL, M. D.

F. M. WOODALL, M. D.

J. C. INMAN, JR., M. D.

W. D. TRUETT, D. D. S.

A. F. DOUGLAS, D. D. S.

W. S. BALLOU, Pharmacist

DELESTER SACKETT, Laboratory Technician

There were in the Institution January 1, 1925, 2,266 patients. From this date to June 30, 1925, there were committed 473 patients, returned from furlough 34, returned from escape 34, babies born 3, patients transferred from other states 2; there were discharged 75, died 187, furloughed 123, escaped 46, babies dying 2, babies sent home 1. At the expiration of this time there were in the Hospital 2,365 patients.

On July 1, 1925, there were in the Hospital 2,365 patients, committed from July 1, 1925, to June 30, 1926, 974 patients; returned from furlough 79, returned from escape 63, babies born 3; there were discharged 156, died 413, furloughed 322, escaped 108, babies sent home 2, leaving in the Hospital at the expiration of this period 2,490 patients.

There were treated in the Hospital from January 1, 1925, to June 30, 1925, 2,812 patients; there died during this period 187 patients, giving a death rate of 6 1/2%. During the period from July 1, 1925, to June 30, 1926, there were treated 3,848, died 413, giving a death rate of 11%. During the period of January 1, 1925, to June 30, 1925, there were admitted to the Hospital 546 patients, released 247, giving percentage of those admitted, released 45%. From July 1, 1925 to June 30, 1926, there were admitted 1,119, released 588, making 51% of those admitted released.

It is noted in this report that for the latter period there is a death rate exceeding that of the former period, which is accounted for by the influenza epidemic referred to above.

The accompanying tabulations give the data relative to the commitments, deaths, releases and handling of patients, together with a summary of the work done during this period.

REPORT OF SUPERINTENDENT OF NURSES

*January 1, 1925 to June 30, 1925**July 1, 1925 to June 30, 1926*

The commencement of the Training School for 1925 was held June 18, 1925, at eight o'clock in the Recreation Hall, Hon. W. V. Knott, Superintendent, presiding. Diplomas were given to three young ladies, being presented by Dr. J. Q. Folmar. The class address was delivered by Mr. C. H. Gray, Superintendent of Public Instruction of Gadsden County. Dr. W. C. McConnell presented the Hospital pins.

The commencement for 1926 was held June 17, 1926, with eight young ladies receiving diplomas, being presented by Dr. J. Q. Folmar. The class address was delivered by Mr. C. W. Hunter. The Hospital pins were presented by Dr. McConnell.

GRADUATES OF CLASS, 1925

MISS LILLA MARSHALL, R. N., Miami, Florida.

MISS MABLE MATHIS, R. N. Miami, Florida.

MISS ROXIE STEWART, R. N., U. S. V. B. Hospital, Lake City, Florida.

GRADUATES OF CLASS, 1926

MRS. MAE CLARK, R. N., Head Nurse of White Receiving Wards, Florida State Hospital, Chattahoochee, Florida.

MISS JESSIE DUKE, R. N., Dietitian, Florida State Hospital, Chattahoochee, Florida.

MISS ELIZABETH DUKE, R. N., Quincy Hospital, Quincy, Florida.

MISS RUBIE EVANS, R. N., Supervisor of Colored Hospital, Florida State Hospital, Chattahoochee, Florida.

MISS EVERGELYN GREEN, R. N., Florida State Hospital, Chattahoochee, Florida.

MISS BESSIE OLIVER, R. N., Baltzell Hospital, Marianna, Florida.

MISS SARA ROBERTS, R. N., Office Nurse for Dr. D. A. McKinnon, Marianna, Florida.

MISS CLAUDIA REDD, R. N., Florida State Hospital, Chatahoochee, Florida.

Respectfully,

J. Q. FOLMAR, M. D.,

Chief Physician.

STEWARD'S REPORT

Commissary, Store Rooms, Kitchen and Dining Rooms

HON. W. V. KNOTT,
Superintendent.

SIR:

I submit herewith report for the period beginning January 1, 1925 and ending June 30, 1926.

The serving of meals and the handling of food supplies has been materially improved throughout the hospital, many changes in the various dining rooms and kitchens having been made, and the installation of more modern equipment having greatly increased the efficiency of this service.

By reference to Table No. I you will note the monthly average and per capita cost of maintenance during the period of this report. The inventories of January 1, 1925 and of June 30, 1926, are shown. In addition to this the following inventory is surplus stock of government goods in storage not included in the inventory mentioned above:

Clothing	\$ 8,324.50
Plumbing and Electrical Supplies	11,220.19
Furniture and Office Supplies	780.00
Machinery	3,250.00
Hardware	2,785.60
Blankets	350.00
Shoes	3,478.00
Paint	2,450.00

Respectfully submitted,

GLEN F. WRIGHT,

Chief Steward.

REPORT OF CHIEF ENGINEER

HON. W. V. KNOTT,
Superintendent.

SIR:

I submit herewith Engineer's Report for the period beginning January 1, 1925, and ending June 30, 1926:

The Steam power plant has operated continuously.

The water turbines have furnished power for pumping water, except while water head was not great enough.

The electric Plant has operated continuously, except when lines have been damaged by lightning and while making high tension connections.

The refrigerating plant has functioned very satisfactorily, running every day, supplying all the ice required and keeping cold storage rooms at proper temperatures.

We have installed and added to plants:

One hydraulic pump, driven by 150 H. P. electric motor, at water works.

One deep well pump, electrically driven.

Three boiler feed pumps.

One air compressor.

One Western steam air pump.

One two-ton ice machine.

One drill grinder.

One milling machine.

One lathe.

The following buildings have been wired in conduit:

Colored female building.

Employees' dining room.

Dental Infirmary.

Laboratory.

Old colored female building.

Garage.

Twelve other buildings and dwellings have been wired.

Electric Equipment has been installed as follows:

One electric water heater in Nurses' Home.

Eleven meters.

Five electric ranges.

Two 100 K. W. Transformers, furnishing current to planing mill, laundry, bakery, dining room and coffee roaster.

Seventeen transformers for other buildings.

One small switchboard with seven phones in white female department.

Thirty-seven telephones in several departments.

One hundred fifty feet, twenty pair, lead cable.

Eight miles galvanized telephone wire.

Seven miles twisted telephone wire connected.

Two and one-half miles high tension line.

Plumbing and heating systems have been put in the following buildings:

Dental Infirmary.

Laboratory.

New Colored Female Building.

White male bath rooms.

Colored male bath rooms.

New hospital kitchen.

New dining room for white female patients.

New receiving hospital.

Nine dwellings.

Water and heat have been installed at poultry farm.

Plumbing fixtures as follows have been installed:

Seventy-eight low tank toilets complete.

Four steel range toilets, four units each.

Four steel range toilets, seven units each.

Ninety-seven lavatories, sinks, etc.

Thirty-eight shower baths.

Seven porcelain enamel bath tubs.

Three urinals.

One American LaFrance fire engine, for fire protection, has been placed ready for instant use.

Syrup works, with steam boiler and storage tank, has been installed on farm.

Three pressing machines have been installed at Laundry.

A brass foundry, near machine shop, has been constructed and equipped.

Two gasoline engines have been installed.

One Duco System Installed.

In addition to above mentioned, this department has done all the repair work, in its several fields, each of which requires much work and constant attention, making together a big item.

Respectfully submitted,

JOHN L. DAVIS,
Chief Engineer.

REPORT OF CONSTRUCTION DEPARTMENT

HON. W. V. KNOTT,

Superintendent.

SIR:

I submit herewith report for the period beginning January 1, 1925, and ending June 30, 1926.

This department has manufactured lumber and other material, erected the buildings, and done the construction and repair work specified below.

The structural steel, machinery, equipment and material, purchased at Government sales, and the timber cut on our

own lands has contributed to the low costs we have been able to maintain.

Timber Cut and Lumber Dressed:

	JANUARY 1, 1925- JUNE 30, 1925	JULY 1, 1925- JUNE 30, 1926
	FEET	
Timber Cut	290,367	787,096
Lumber Dressed	325,944	654,773
	NUMBER	
Shingles	0	70,450
Posts	0	458
Laths	17,600	40,100

The following is a list of work done:

NEW CONSTRUCTION

Dining room for white females.
 Meat cutting room adjoining cold storage rooms.
 General garage near power house 57'x90'.
 Individual garage, ten stalls, near Receiving Hospital.
 Dairy building on farm in Jackson County.
 Dairy barn on farm in Jackson County.
 Concrete reservoirs at spring for drinking water.
 Foundations for 250,000 gal. water tank.
 Foundations for gas tank at railroad spur track.
 Dwelling for Farm Supervisor.
 Five cottages for other employees.

ADDITIONS, ALTERATIONS, ETC.

Remodeled ward building for white females.
 Six new bath rooms for building for white females.
 Six new bath rooms for building for white males.
 Re-roofing old dining rooms.
 Converting part of old Magazine into casket factory.
 White male ward buildings have been improved and re-

paired, the cost of which has been about \$3,500.

Many buildings have been repainted.

The Cement Block Plant has operated successfully, furnishing blocks for buildings constructed, besides having a stock of 52,000 blocks for buildings in progress.

Saw and Planer mills have been in constant operation, manufacturing lumber as shown in table herewith.

The Repair Department has had four men constantly employed in the proper maintenance and repair of the many buildings.

Respectfully submitted,

JOHN B. HOWELL,

Foreman.

BALANCE SHEET FOR PERIOD BEGINNING JAN. 1,
1925, AND ENDING JUNE 30, 1926:
